

Uncovering Synaptic Plasticity - from Molecules to Memory

FOR 2419 Symposium on 16th February 2018

Scientific Programme

- 09:00 Welcome and opening remarks – Prof. Matthias Kneussel
- 09:15 **Rob Meijers, Hamburg: *Netrin - a guidance cue that acts as an adhesive glue****
- 10:15 *Coffee break*
- 10:30 Dr. Pirta Hotulainen, Helsinki: *Actin in synaptic plasticity and learning*
- 11:30 Short talks of the organizers
- 12:30 Break
- 13:30 Poster session
- 14:30 Prof. Annie Andrieux, Grenoble: *MAP6 proteins: from microtubule stabilization to brain morphogenesis through the regulation of actin dynamic during synaptic plasticity*
- 15:30 Prof. Ryohei Yasuda, MPI Florida: *Biochemical computation in single dendritic spines*
- 16:30 *Coffee break*
- 16:45 Prof. Martin Müller, Zurich: *Linking presynaptic proteostasis to homeostatic plasticity*
- 17:45 Prof. Bernardo Sabatini, Boston: *Multitransmitter neurons – more than an oddity*
- 18:45 Closing remarks – Margarita Anisimova

www.uke.de/FOR2419

Venue:
UKE Campus Building W29
„Erika-Haus“
Martinistr. 52, Hamburg

Organizers:
PhD students of the DFG-funded
Research Unit FOR 2419:

Margarita Anisimova
Ole Johanns
Sergei Klykov
Anja Konietzny
Mauro Pulin
Jennifer Radwitz
Mona Roesler

*Last minute change.
